

Earth Week Solar Night – Wednesday, April 18

Last July, CIPL and host MCC in the Valley Church held a successful Solar Night. We had such fun, we're doing it again in celebration of Earth Week! More and more congregations of all faiths are choosing to enact the principle of creation stewardship by installing sustainable forms of energy, in particular solar. Solar energy assists in decreasing a congregation's carbon footprint, and saves energy and money. Come to this presentation to learn more!

What to expect:

- A chance to meet members of California Interfaith Power & Light, and others interested in creation stewardship
- Presentations by three solar companies and Energy Upgrade California
- Overview of solar financing for congregations and residences
- Q&A session to get all your solar questions answered
- Light refreshments
