## *Gasland: Part II*

Friday, October 11, 6:30pm  
Unitarian Universalist Center  
1187 Franklin Street @ Geary

This is Josh Fox's awaited sequel to Gasland and fires us up over Hydraulic Fracturing in this country. It takes us to the oil fields of several U.S. towns and includes some international footage.

We visit the offices of politicians and the halls of Congress to give a glimpse of the hardball nature of the corruption involved. He is quoted as saying:

*"I felt like I could see it: a horizontal well bore, drilled down into the earth, snaking underneath the Congress, shooting money up through the chamber at such high pressure that it blew the top off our democracy."*

Admission is free / donations appreciated.

As usual, popcorn and other refreshments will also be available.
